

Twin Corresponding Sudoku

Twin Corresponding Sudoku is a pair of 9x9 Sudokus. The two puzzles are identical, except that the positions of the numbers 1 and 2 are swapped. This means that if a cell contains a 1 in one puzzle, it will contain a 2 in the other, and vice versa. All other numbers remain in the same positions. The goal is to solve both puzzles simultaneously, taking into account the relationship between the two grids.

(Twin)
