

Twin Corresponding Sudoku

Twin Corresponding Sudoku is a pair of 9x9 Sudokus. The two puzzles are identical, except for the positions of the numbers 1 and 2. In the first puzzle, the numbers 1 and 2 are in the same positions as in the second puzzle, but the positions of the numbers 1 and 2 are swapped. This means that if a cell contains a 1 in the first puzzle, it will contain a 2 in the second puzzle, and vice versa. All other numbers (3-9) remain in the same positions in both puzzles.
